Global Equity Fund - UCITS (the "Fund"): I Share Class USD (Voting, Accumulating Shares)

(ISIN: IE000NUYGHL8). The Fund is managed by Mirabella Financial Services LLP (the "Investment Manager")

The management company of the Fund is Wystone Management Company (IE) Limited (the "Manager")

The Fund is a sub-fund of Pinnacle ICAV (the "ICAV")

INVESTMENT OBJECTIVE AND POLICY

Investment Objective:

- The Fund aims to participate in the long-term total return of Global Equity Markets. Its performance target is to outperform the MSCI World Net Total Return Index USD (the 'Benchmark') after deducting charges, over rolling five-year periods. The Fund will seek to achieve this objective by predominantly investing in the shares of companies that are listed on Regulated Markets.

Investment Policy:

- The Fund will invest at least 90% of its Net Asset Value in the shares of companies globally, both in Developed Markets and Emerging Markets.
- There are no restrictions on the Fund in terms of sector and market capitalisation. However, the Fund's country and sector weights, including its investment in Emerging Markets, will generally align with those of the Benchmark. The Fund may allocate up to 20% of its Net Asset Value to Emerging Markets.
- The Fund may also invest up to 10% in other investment funds, known as collective investment schemes, including funds managed by the Investment Manager, the Manager or the ICAV.
- A limited amount of assets (around 10% or less) may be held in cash for efficient portfolio management purposes and to manage the flow of investors' money in and out of the Fund.
- The Fund does not intend to track the Benchmark, and investors should note that the Benchmark is being used by the Fund for performance comparison purposes only. While the Fund may invest in

investments which are constituents of the Benchmark, the Fund will be actively managed, and its portfolio will not be constrained by reference to any index. The Investment Manager may use its discretion to invest in instruments which are not included in the Benchmark. The Fund will usually be invested in a portfolio of 150-250 holdings.

- The Fund may use financial derivative instruments for efficient portfolio management and hedging purposes only. Investors should refer to "Financial Derivative Instruments and Efficient Portfolio Management" in the Fund's Supplement. In particular, the Fund may use spot and currency forward contracts to hedge non-base currency positions in the Fund back to the base currency to reduce currency risk. Index futures may also be used for the purpose of efficient portfolio management.

Other Information:

- The Fund's investment policy is to invest in global equities and asset classes which may cause the Net Asset Value of the Fund to have high volatility.
- Shares in the I Share Class USD are accumulating, voting shares. Accordingly, income and capital gains arising in respect of the share class will be re-invested and reflected in the Net Asset Value per Share of the Share Class.
- You can buy or sell shares on demand every Business Day in Ireland, London, United Kingdom and United States of America subject to the terms set out in the section entitled Key Information for Purchasing and Repurchasing of the Fund's Supplement (which together with the prospectus constitutes the Prospectus).

Please see the sections entitled Investment Objective, Investment Policies and Investment Restrictions of the Prospectus where full details are disclosed.

RISK AND REWARD PROFILE

Lower risk

Higher risk

The indicator above illustrates the position of this Fund on a standard risk/reward category scale. Please note that:

- the risk reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund;
- the risk category shown is not guaranteed and may shift over time; and
- even the lowest category does not mean your investment is 'risk free'.

Due to the Fund's lack of operating history, this rating is based on the historical volatility of returns from a similar strategy previously managed by the investment team. As this risk rating is not derived fully from the actual Fund, it may not reflect the Fund's actual risk level in the future.

The following risks are not adequately captured by the indicator:

- Operational Risk.** The Fund is exposed to the potential for loss caused by a deficiency in information, communications, transaction, processing and settlement, and accounting systems. The main risk is that third parties may fail to ensure that statutory requirements are met.
- Market Risk.** Investments in securities involve issuer, industry, market and general economic related risks. Adverse developments or perceived adverse developments in one or more of these areas could cause a substantial decline in the value of securities held by the Fund.
- Foreign Investment Risk** Investments in foreign companies may decline in value because of sovereign, political, economic or market instability; the absence of accurate information about the companies; risks of unfavourable government actions such as expropriation and nationalisation.
- Emerging Market Risk.** There are specific risks associated with investments in emerging markets, including political, settlement, credit, liquidity, currency, accounting standards, legal/regulatory and custodial/registration risk.
- Currency Risk.** The Fund will be exposed to different currencies and changes in foreign exchange rates could create losses.
- Liquidity Risk.** Certain securities may be difficult or impossible to sell at the time and the price that the seller would like. The seller may have to lower the price to affect a secondary market sale, sell other securities instead or forego an investment opportunity, any of which could have a negative effect on fund management or performance.
- Investment Management Risk.** The discretionary management style applied to the Fund relies on anticipating various market developments and/or security selection. There is a risk that at any given time the Fund may not be invested in the highest performing markets or securities. The Fund's Net Asset Value may also decline.

Please see the section entitled Risk Factors of the Prospectus where full details of all the risks of the Fund are disclosed.
